ISO 9001:2000 CERTIFIED WOMAN OWNED CERTIFIED HUB ZONE CERTIFIED

Thank you for taking a moment to look at our Company overview. Our capabilities may or may not coincide with your manufacturing needs.

We are a privately owned precision sheet metal shop and high quality machine shop specializing in close tolerance machine shop and sheet metal fabrication as well as commercial applications. We build to print or part, and aid in custom designs.

Since we were established in 1978, we have made parts and equipment for industries such as aircraft, electronics, missiles, oil and gas, mining, and computers, just to name a few.

Electronic equipment, such as Frames, Chassis, Panels, and Cabinetry are fabricated in our sheet metal department with our machine shop working almost any kind of part, except gear and sprocket teeth.

Enclosed is our Facility List. Please take a moment to review our capabilities and possibilities.

If we can be of service, please feel free to contact us by phone 903-886-4779, by fax 903-886-4842, or by e-mail at esquiretooling@embarqmail.com

Sincerely,

Nelson Chapman
President
